

Notes vault — agent rules

Learning / operator notes vault (not a live attack tree).

Hard rules (canonical under `rules/`)

Do not duplicate policy here. Read and obey these files:

Rule	Path
Ship pipeline (content gen → content_eval 3x → git push → mail)	rules/ship-pipeline-mandatory.md
content_eval 3-pass loop	rules/content-eval-mandatory.md
Study research pack (official docs + gold-mine blogs)	rules/study-sources-mandatory.md
Index	rules/README.md

Also loaded for harness auto-discovery via `.grok/rules/` (symlinks → `rules/`).

Default: every keepable deliverable runs the full ship pipeline unless the operator uses an explicit skip phrase listed in `rules/ship-pipeline-mandatory.md`.

content_eval tooling

piece	path
agent	<code>.grok/agents/content_eval.md</code>
skill	<code>.grok/skills/content-eval/SKILL.md</code> → <code>/content-eval</code>

Tone

- frugal, copy-paste useful, just-in-time why
- first principles over tour-guide fluff
- authorized-testing scope only when discussing attacks
